## *SKYAPP Point of Sale System*

SKYAPP POS is a modern point-of-sale system that makes it simple to sell to your customers, and keep them coming back to your store. It works on standard POS hardware, PC, tablets and connects to all the latest hardware - barcode scanners, receipt printers, cash drawers. It may even work with the hardware you already own!

- Modern POS with option for TabletPOS for mobility and simplicity of operations.
- Supports online and offline operating modes to maximize cashiering transactions.
- No investment and hassle of physical data rooms, servers, racks, data backups and maintenance.
- Multi-channel inventory management across traditional retail outlets and virtual eShops.
- Access your crucial store operations, sales data and inventory management anytime, anywhere.
- Suitable for Speciality Stores, Fashion, Food & Beverages, Quick Service, watch and mobile shops.

Being able to work under both online and offline modes, SKYAPP POS helps you to keep ringing up sales even when your internet connection lets you down. Your sales will automatically update to our servers the next time you go online. This reduces cashier errors and prevents settlement discrepancies.

The comprehensive and practical operations help to streamline your retail checkout process for your employees and customers.
